WORK EXPERIENCE

MUI — *a hugely popular French open-source company (80k+ GitHub stars)*

Senior full stack developer

Apr '23 - present
Next.js, Node.js, Typescript, Docker, GitHub Actions

- Led efforts in the 5+ member, **globally remote docs infra team** for adding multi-file support to demos through a **Next.js loader**
- Built server-side queries in Next.js and a Node.js CLI (Command Line Interface) for Toolpad - MUI's low-code effort.

Full stack developer

Nov '21 - Mar '23
Next.js, Node.js, Typescript

- Added **live code editing** to demos on the Material UI docs in Next.js for **1 million+ monthly users**
- Part of a **3 member, globally remote team working on low-code initiatives** for MUI.

Samagra — Software Engineer I

May '20 - Oct '21
Next.js, Node.js PostgreSQL, GraphQL GitHub Actions, Docker

- Created a new low-code platform on top of Next.js and a GraphQL backend to automate manual tasks, deployed in government departments across **3 Indian states**
- Implemented a **PDF export service in Node.js** as part of a team of 50+ engineers - deployed to **20 million government school students**.

Atlan — Frontend Intern

May - Jun '19
Vue, Nuxt.js

- Built a **visual SQL query editor in Nuxt.js** for Atlan's modern data collaboration workspace.
- Contributed to the **frontend architecture revamp of DISHA**; deployed for **500+ members of the Indian parliament**.

May - Jun '18
Vue

SELECTED PROJECTS

Civic Tech Field Guide — Full Stack Consultant

Jan '22 - present
Golang, AWS

- Built **Golang scripts to automate screenshot capture and storage in AWS S3** for a large non-profit entity.

Argonaut — Full Stack Engineer

Sept '19
Node.js

- Built the **Node.js backend to manage transactions for Argonaut**, a cryptocurrency-based data marketplace. **Won 1st position at HackMIT, 2019.**

SELECTED
HONOURS

Turkbox — *Full Stack Engineer*

Aug '19 - Sep '21
React, Node.js, GCP

- Founding full stack developer at Turkbox, **building widgets in React for data segmentation tasks**, to be embedded in other websites. **Seed funded by the Google News Initiative**

Formula Student — *Data Acquisition Engineer*

July '17
Angular, Node.js

- Built an **Angular dashboard and a Node.js backend** to receive telemetry events from an **Arduino Micocontroller in a car engine**. **Won sixth place at Formula Student Italy, 2017.**

Hasura — *Community Champion*

Sep '22 - present

- Chosen as a **“GraphQL community champion”** due to open-source contributions to Hasura’s **GraphQL to React connector**
